Join us for a two-week summer program to experience different engineering fields!

Engineers make the world work! Spend two weeks this summer exploring various disciplines offered in engineering. Experience engineering by designing, building, and testing team-oriented, hands-on projects.

The cost of this two-week program is $750. However, all low-income students accepted to this program will receive a FULL SCHOLARSHIP; this will be based on participation in the free or reduced school lunch program.

Program hours are 9:00am to 5:00pm Monday through Friday of each week. Lunch will be provided each day of the program. Participants will be responsible for own transportation to and from the USC campus daily.

To apply, you will need to complete an online application, submit the School Records Request Form to your school, and give the Teacher Recommendation Form to a math or science teacher. All application materials must be received by May 1, 2018.

The application, forms, and more information can be found at: https://viterbipk12.usc.edu/missionengineering

All students who participate in Mission Engineering must meet the following requirements:

- Submit a complete application, including recommendation and school records.
- Currently be enrolled in the 10th or 11th grade
- Complete Algebra 2 or higher with at least a B by June 2017
- Have at least a 3.0 GPA in college prep courses
- Priority will be given to active MESA and Viterbi STEM School Partners students

For questions, contact Dr. Rochelle Urban, rurban@usc.edu.
