Mission Engineering
July 9 to July 20, 2018

Join us for a two-week summer program to experience different engineering fields!

Engineers make the world work! Spend two weeks this summer exploring various disciplines offered in engineering. Experience engineering by designing, building, and testing team-oriented, hands-on projects.

The cost of this program is $750. However, all low-income students accepted to the program will receive a FULL SCHOLARSHIP, based on participation in free/reduced lunch program.

Program hours are 9:00am to 5:00pm, Monday through Friday of each week. Lunch will be provided each day of the program. Participants will be responsible for their own transportation to and from the USC campus daily.

To apply, complete an online application, submit the School Records Request Form to your school, and give the Teacher Recommendation Form to a math or science teacher.

All application materials must be received by May 1, 2018. Complete applications received by April 11 will be reviewed early, but early submissions will not increase your chances of acceptance.

The application, forms, and more information can be found at: https://viterbipk12.usc.edu/missionengineering

All students who participate in Mission Engineering must meet the following requirements:
- Submit a complete application, including recommendation and school records.
- Currently be enrolled in the 10th or 11th grade
- Complete Algebra 2 or higher with at least a B by June 2018
- Have at least a 3.0 GPA in college prep courses
- Priority will be given to MESA and Viterbi Partners students

For questions, contact Dr. Rochelle Urban, rurban@usc.edu.
